The report on “**Migration and Urbanisation in Ethiopia with Special Reference to Addis Ababa**” is a product of a team effort by a group of Italian and Ethiopian experts. The Italian counterparts are from the University of Rome, Department of Demography and are composed of Antonio Golini (coordinator), Oliviero Casacchia, Cecilia Reynaud and Sara Basso. A fruitful cooperation was given by Lorenzo Cassata and Massimiliano Crisci and a precious help by Raffaella Iacocucci, Enza Regine and Mekonen Zeray Asfaha. The Ethiopian expert, Mohammed Said, is from the Central Statistical Authority, Population Studies and Analysis Centre.

During the long research activity some scholars, who were originally included in the group were obliged to leave it or resigned from it. Therefore some specialization have been lacking; among them the town-planning one.

Authors are deeply grateful to Prof. Francesco Maimone and Dr Roberto Bianchini of CIRPS (Centro Interuniversitario per la ricerca nei paesi in via di sviluppo) who created digital maps from the charts provided b CSA. Their help was essential for cartographical representation of data and for geographical analysis of many issues. Our gratitude also goes to Tabit Haji Ahmed and Kifle Gebre of the CSA, Computer Department, who produced tabulated data used in the analysis.
